Halogen moisture analyser DIS

For demanding analyses

With halogen technology

Introductory price:
- 25%

Properties

- Backlit LCD graphic display
- Very high resolution
- Real-time visualisation: Drying curves can be shown directly on the display
- Excellent temperature control thanks to halogen technology, suitable for temperature-sensitive samples
- The last measured value remains visible in the display until the next measurement
- Sample description for up to 1000 samples, freely programmable, and is printed in the measuring protocol
- Date and time display
- Weighing system with overload protection
- RS-232 and USB data interface

Scope of supply: Moisture analyser, 50 sample plates, protective working cover and protective dust cover

NEW

Hochpräziser Feuchtebestimmer für viele Anwendungen z.B. in der Lebensmittelverarbeitung, Qualitätskontrolle, Industrie, analytische und chemische Laboratorien.

specifications
